Applicant <b>MICROSOFT CORPORATION</b>		

This international search report has been prepared by this International Searching Authority and is transmitted to the applicant according to Article 18. A copy is being transmitted to the International Bureau.

This international search report consists of a total of 4 sheets.

It is also accompanied by a copy of each prior art document cited in this report.

**1. Basis of the Report**

- a. With regard to the **language**, the international search was carried out on the basis of:
  - the international application in the language in which it was filed.
  - a translation of the international application into \_\_\_\_\_, which is the language of a translation furnished for the purposes of international search (Rules 12.3(a) and 23.1(b))
- b.  With regard to any **nucleotide and/or amino acid sequence** disclosed in the international application, see Box No. I
- 2.  **Certain claims were found unsearchable** (See Box No. II)
- 3.  **Unity of invention is lacking** (See Box No. III)
- 4. With regard to the **title**,
  - the text is approved as submitted by the applicant.
  - the text has been established by this Authority to read as follows:
- 5. With regard to the **abstract**,

**Box IV TEXT OF THE ABSTRACT (Continuation of Item 5 of the first sheet)**

The technical features mentioned in the abstract do not include a reference sign between parentheses (PCT Rule 8.1(d)).

**NEW ABSTRACT**

The present invention relates to a system and method to facilitate providing computer users with efficient access to electronic notifications while minimizing disruption in the context of ongoing tasks. A notification system (120) provides visual information heralds (160) that provide summarizations of notifications to users. An information controller (130) considers the importance or urgency of content and a user's current and/or recent activities in decisions about the rendering and positioning of the information herald (160) on a display screen or screens (150, 170) in order to facilitate user processing of the summarized notifications with minimal disruption to ongoing tasks.
